

Unifeeder expands into the UK

→ CONTAINER FEEDER SERVICE

Three new services – five new ports

Unifeeder, provider of Northern Europe's largest feeder network for container transportation, now offers a number of new destinations, as we have added the UK ports Felixstowe, Immingham, Teesport, South Shields and Grangemouth to our extensive network.

Regular service

Unifeeder's new UK service operates minimum three container vessels providing an annual capacity of more than 100,000 TEU in routes between Hamburg, Rotterdam and the UK.

The new service offers regular routes with fixed-day schedules and several weekly calls at all the ports, and combined with our wide-ranging network, this adds to the level of reliability and flexibility, that are key Unifeeder characteristics.

Powerful network

Based on our strong network, Unifeeder operates regular container liner services between Scandinavia, Finland, the Baltic states, Russia and Poland, and the major continental hubs in Northern Europe. Thus, with direct access to our entire network via Hamburg and Rotterdam, we offer unique, fast and reliable connections to and from the UK and Northern Europe. By providing the broadest feeder network in Northern Europe, combined with our comprehensive knowledge and experience in the field, Unifeeder always provides a high level of flexibility and excellent service.

UNIFEEDER

At Unifeeder we are all about

RELIABLE SERVICES

For more than 30 years we have provided our customers with a reliable, flexible and secure service. We offer daily calls on the busiest routes and fixed-day services on any other destination in our network. Our network can be accessed 24/7 and the whole process can be handled easily and efficiently online and in real time.

ENVIRONMENTAL CONCERNS

As a key player in global supply chains, we recognize our role in the global carbon budget. Our newly launched CO₂ calculator is an effective tool in measuring and comparing the CO₂ emissions from the process of moving goods, enabling our customers to meet the increasing environmental concerns and demands of their customers.

ECONOMIC RATIONALITY

By continuously keeping up with the newest trends in our field we persistently strive to improve and deliver the best solution possible. Unifeeder's reputation of being cost-effective and delivering high-quality service must continually be earned, and we are proud to say that we constantly focus on efficiency as well as process and product optimisation to the benefit of our customers.

FLEXIBILITY

At Unifeeder we offer our customers high-grade logistic solutions as our network integrates the predictability of route traffic with a high level of flexibility. The combination of our extensive network and our business structure makes it possible for us to exploit the advantages of large-scale operations, while also creating specific solutions to meet individual customer requirements.
