

Unifeeder expands into the UK

→ SHORTSEA SERVICE

Three new services – five new ports

Unifeeder now offers a number of new destinations and will from mid June 2010 serve the ports of Felixstowe, Immingham, Teesport, South Shields and Grangemouth in the UK.

Regular service

Unifeeder's new UK service operates minimum three container vessels providing an annual capacity of more than 100,000 TEU in regular routes between Hamburg, Rotterdam and the UK. The new service provides fixed-day schedules and several weekly calls at all the ports and will be an important part of Europe's most comprehensive shortsea network.

With Hamburg and Rotterdam as hubs in Continental Europe, the UK destinations are now closely connected to the entire Unifeeder network. The new service brings fresh opportunities for linking the UK with existing destinations in Scandinavia, the Baltic states, Finland, Russia and Poland. Unifeeder employs any relevant equipment, and any container size up to 45' palletwide, throughout the network and provides unique opportunities for creating competitive multimodal transportation.

UNIFEEDER

At Unifeeder we are all about

ECONOMIC RATIONALITY

By constantly keeping up with the newest trends in our field we persistently strive for improving and delivering the best solution possible. Intermodal transport is more cost-effective than transport by trailer and it is closely coordinated with our customers, thereby securing just-in-time loading and delivery. Unifeeder's Shortsea Service creates logistic advantages for our customers by improving efficiency and large-scale operation.

FLEXIBILITY

Unifeeder's customers are provided with high-grade logistic solutions as our network integrates the predictability of route traffic with a high level of flexibility. The combination of our extensive network and our business structure makes it possible for us to exploit the advantages of large-scale operations, while also creating specific solutions to meet individual customer requirements.

CUSTOMIZED INTERMODAL SOLUTIONS

We deliver door-to-door solutions all over Northern and Central Europe. With our extensive network, we offer customized services that meet your specific needs. The 45' palletwide container is completely integrated into our intermodal services, allowing us to optimize our intra-European container transports to the same intake as trailer transport.

ENVIRONMENTAL CONCERNS

As a key player in global supply chains, we recognize our role in the global carbon budget. Our newly launched CO₂ calculator is an effective tool in measuring and comparing the CO₂ emissions from the process of moving goods, enabling our customers to meet the increasing environmental concerns and demands of their customers.
